Summary

Experienced web app designer with a proven track record of delivering innovative and user-friendly digital solutions. Skilled in both front-end and back-end development, with a passion for creating visually appealing and functional interfaces. Proficient in various programming languages and frameworks, with a strong understanding of UI/UX design principles. Excited to bring my expertise to Tastybytes and contribute to the development of an exceptional online food truck ordering platform.

Projects:

- Developed a real-time chat application using Socket.io for instant messaging and WebRTC for video calls.
- Built a custom content management system (CMS) for managing and publishing website content, featuring a user-friendly interface and role-based access control.
- Created a responsive web app for a local restaurant to enable online ordering and table reservations, integrating with a backend database for order management.

Portfolio:

- Available upon request or visit my GitHub profile at github.com/dmitri-ivanov for code samples and project demos.

Experience

Moscow, Russia

Freelance Web Designer & Developer

- Worked independently with clients to design and develop custom websites and web applications.
- Utilized a combination of HTML, CSS, JavaScript, and popular frameworks to create visually appealing and functional interfaces.
- Conducted user research and usability testing to gather feedback and iterate on designs, ensuring optimal user experience.
- Provided ongoing maintenance and support for clients' websites, implementing updates and enhancements as needed.

Digital Solutions Ltd. | Moscow, Russia

Lead Web Developer

- Led a team of developers in designing and implementing web applications for clients in various industries.
- Developed custom solutions using modern front-end frameworks like React.js and Vue.js, ensuring optimal performance and user experience.
- Designed intuitive user interfaces and implemented responsive design techniques to deliver seamless experiences across devices.
- Integrated e-commerce functionality, including payment gateways and order management systems, to enable online transactions and enhance user engagement.
- Collaborated closely with clients to understand their requirements and provide tailored solutions that met their business objectives.
